

A Functional Dish Set for Two

Requirements:

- 4 functional dishes (all thrown on the wheel and trimmed)
 - 2 bowls (identical in shape and size)
 - 2 mugs with handles (identical in shape and size)
- All dishes must be functional and glazed
- All dishes must be a set
 - Glazed similarly or the same (required)
 - You can add designs or decorations (optional but still must function)
- Good craftsmanship and quality
 - No cracks or chips
- Approximately dinner size dishes
 - Bowls – approximately 5-6 in diameter at top and 2-5 inch height (salad, soup, or cereal bowl size)
 - Mugs – big enough to hold 10-12 oz beverage (think of a souvenir coffee mug)

Grading: (44 points total)

Each bowl is worth 10 points and the point breakdown is as follows:

- 2 points for making and trimming the dish (must be glaze fired to receive credit)
- 2 points for having it the correct size (see above)
- 2 points for glazing well and matching other dishes (cannot stick to slab or shelf...avoid this by having a high foot)
- 2 points for quality and craftsmanship (no cracks or chips)
- 2 points if dish is close to matching the other in shape, size and thickness

Each mug is worth 12 points and the point breakdown is the same as above with an additional:

- 2 points for attaching handles that stay attached without pulling away from the mug and free of cracks

Additional deductions

- -5 for each dish without a visible name incised in clay on the foot (pre firing)
- -10 points for each dish not made (or incomplete)
- -10 points for each dish completely cracked into 2 or more pieces
- -5 points (off overall score) for being turned in late
- -4 points for each dish that is questionable as to what it is (i.e bowls that could be mistaken for mugs, vice versa, etc.)

Due Dates:

Must be made/built and on bisque cart by _____ Must be glazed on glaze cart by _____
